**ASSESSMENT – ELEVATING WORK PLATFORMS**

Name: .............................................................

Date: .............................................................

I.D. (if applicable): ..........................................

Score

1. **What are the 2 basic types of EWP?**
   
   A) Vertically Ascending and Boom Type  
   B) Vertically Ascending and Crane  
   C) Boom Type and Forklift  
   D) Forklift and Crane

2. **Where must a Vertically Ascending EWP be positioned in relation to a work area?**
   
   A) Wherever you choose  
   B) At a 45 degree angle to the work  
   C) Directly underneath or next to it  
   D) All of the above

3. **All EWPs have a safe working load. Where can this information be found?**
   
   A) It is only available from the manufacturer  
   B) On the load capacity data plate on the EWP  
   C) The safe working load is what feels right for the job  
   D) On the tyres of the EWP
4. Which of these are pre-operational checks that must be done on an EWP?

A) Checking tyres and wheels  
B) Checking the lifting mechanism  
C) Checking ground controls  
D) All of the above

5. Do EWP operators need to be trained and qualified?

A) No  
B) Yes  
C) Only if working above 3 meters  
D) Only if working alone

6. What is slew?

A) The maximum height an EWP can go  
B) Rotation of the base of an EWP  
C) When an EWP tips over  
D) None of the above

7. What should be done if a fault is found with an EWP?

A) It should be tagged and removed from service  
B) It depends if the fault is related to the support jacks or not  
C) Complete the job you are doing then remove it from service  
D) It is up to you

8. If working near power lines, what piece of information is it crucial that you know?

A) The duration of the job  
B) What metal the EWP is made of  
C) Maximum height of the EWP  
D) The minimum safe distance the EWP must be from the lines
9. **What PPE must be work when in a boom-type EWP?**

   A) Gloves  
   B) Safety Harness  
   C) Ear plugs  
   D) Body Belt

10. **When is it acceptable to use an EWP as a crane?**

    A) Only when it is a boom type EWP  
    B) When the total load to be lifted is less than the weight of the basket  
    C) Never  
    D) Only if no one is in the basket
