1. The information contained in this Facilitator's guide is distributed and sold as a guide and for informational purposes only. Safecare makes no representation or warranty as to the compliance of this program with any and all applicable laws of the purchaser's jurisdiction.

2. Safecare's liability for any damages to the purchaser or to any other party shall not exceed the amount paid by the purchaser for the guide. In no event shall Safecare be responsible for any indirect or consequential damages or loss of profits, even if Safecare has been advised of the possibility of such damage. Some provinces/states do not allow the limitations or exclusion of liability for incidental or consequential damages, so the above limitations or exclusions may not apply to the purchaser.

3. This Facilitator's Guide is supplied as part of a Safecare subscription service. This guide is only to be used during a valid subscription period. Where a Safecare subscription is not valid, this guide may not be used.

2. ______________ guards are guards that work together with the equipment. They are directly related to either the power supply to the equipment, or the actual movement of the equipment, or both the power supply and movement.
   a) Transparent
   b) Fixed
   c) Light
   d) Interlocked

3. Which of these is a type of machine guard?
   a) Fixed
   b) Distance
   c) Adjustable
   d) All of the above

4. ______________ guards adjust or align themselves according to the size of the material being passed through or into the equipment.
   a) Clear
   b) Mesh
   c) Self-Adjusting
   d) Simple
5. **What should you not wear near moving machine parts?**

   a) PPE  
   b) Work boots  
   c) Loose-fitting clothing  
   d) Sunscreen

6. **Which of these risks are associated with mechanical hazards?**

   a) Entanglement  
   b) Crushing  
   c) Cutting and Tearing  
   d) All of the above

7. **What is an example of a rotating and tangentially moving surface?**

   a) Conveyor belt  
   b) Heater  
   c) Manual Handling  
   d) Machine Guard

8. **What is an example of an item where you could become caught between a rotating and fixed surface?**

   a) Drive Shaft  
   b) Ventilation fan  
   c) Press  
   d) Hammer

9. **What is an example of an environment where one could become caught by moving material and products?**

   a) Production Line  
   b) Storage Area  
   c) Retail Area  
   d) None of the Above

10. **Cutting injuries are commonly associated with which items?**

    a) Bench saws  
    b) Jig Saws  
    c) Circular Saws  
    d) All of the above
